GOAL: Conduct Research to Identify Causes And Propose Solutions for Education Challenges in Alaska.

Rationale

Product – June 2011

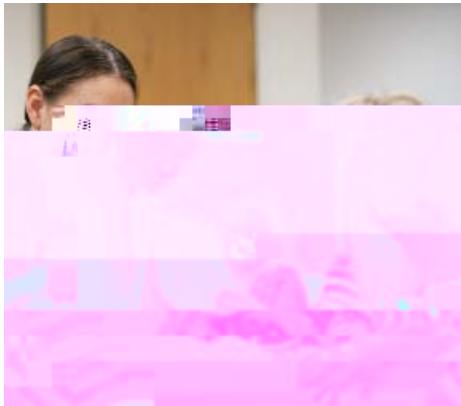

The product was developed to identify education challenges in Alaska and propose solutions. It includes research findings, analysis, and recommendations. The research focused on various topics such as teacher retention, student achievement, and educational funding. The analysis identified key challenges and trends. The recommendations provided practical solutions to address these challenges. The product was presented to state education officials and stakeholders.

Product - January 2012

The product was updated to reflect new research findings and incorporate feedback from stakeholders. The updated version includes revised analysis and updated recommendations. The product remains a valuable resource for education professionals in Alaska.

Performance Target

The performance target is to increase UA education faculty research capacity. This involves increasing the number of research grants awarded to UA education faculty and improving the quality of their research output. The target also aims to increase student engagement in research projects and encourage them to pursue careers in research.

UAA College of Education graduate student at the Anchorage Summer Speech-Language Clinic.

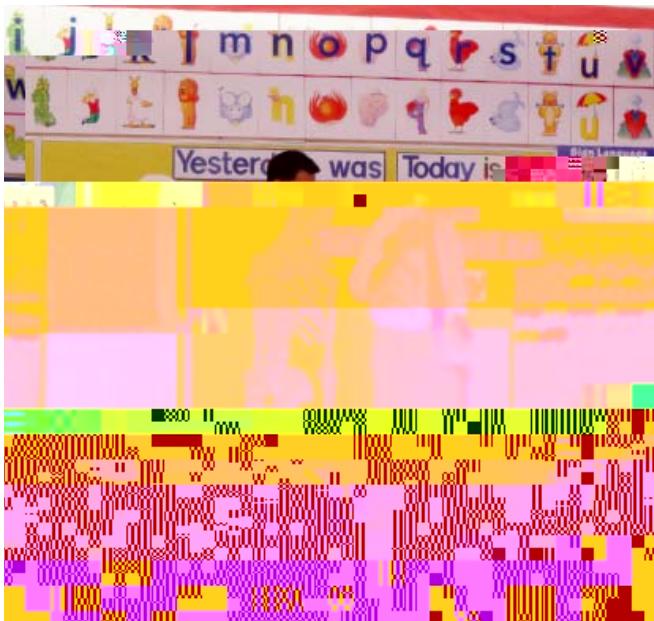

Action: Increase UA education faculty research capacity.

The action involves increasing the number of research grants awarded to UA education faculty and improving the quality of their research output. This will be achieved by providing resources and support to faculty members, encouraging them to engage in research activities, and recognizing their contributions through awards and recognition. The target is to increase student engagement in research projects and encourage them to pursue careers in research.

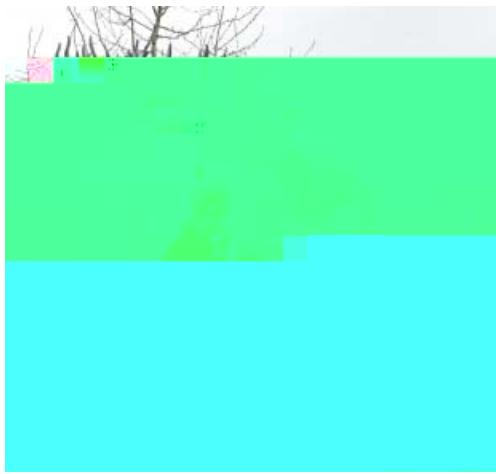

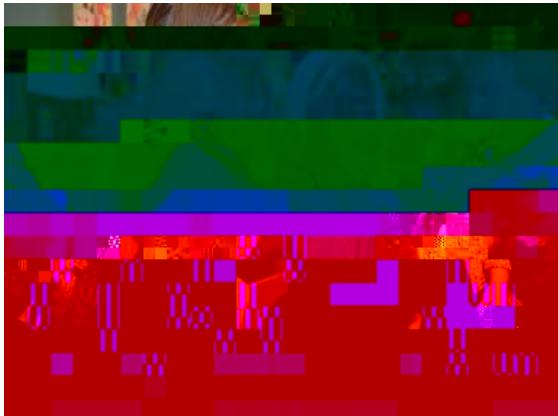

CONCLUSION

The project has been successful in identifying education challenges in Alaska and proposing practical solutions. The research findings have provided valuable insights into the challenges faced by educators and students. The recommendations have been well-received by state education officials and stakeholders. The product remains a valuable resource for education professionals in Alaska.

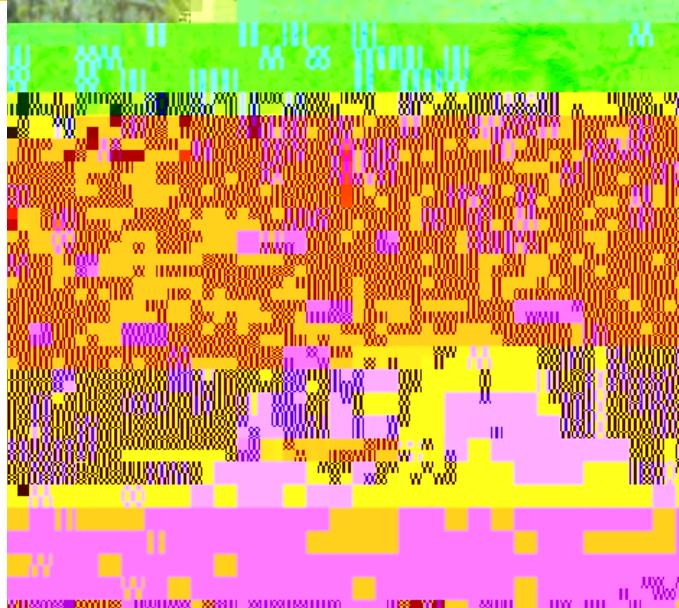

UAA College of Education Elementary Education intern.

Early Childhood Education intern at Providence Early Learning Lab, a community partner with the UAA College of Education.

A UAF Elementary Education intern teaches students about moose.

UAF School of Education student learning about science education in the field.
